

TRACE: Pricing & Economics

Pricing Model

TRACE offers two pricing tiers: **Dealer License** at \$299/month per location (up to 20 tech seats, all fault codes, audit dashboard) for independent Cummins dealers, and **Enterprise Fleet** at \$12/ticket (pay-per-use, API access, SLA guarantee) for national fleet operators.

3-Year Revenue Projection

	Year 1	Year 2	Year 3
Dealer customers	20	75	200
Dealer revenue (\$299/mo each)	\$71,760	\$269,100	\$717,600
Enterprise tickets/month	500	3,000	10,000
Enterprise revenue (\$12/ticket)	\$72,000	\$432,000	\$1,440,000
Total Revenue	\$143,760	\$701,100	\$2,157,600

Cost Structure

Cost Item	Year 1	Year 2	Year 3
Cloud hosting (Supabase, sync servers)	\$6,000	\$18,000	\$48,000
Engineering salaries (2 devs)	\$200,000	\$220,000	\$300,000
Sales and onboarding	\$30,000	\$60,000	\$100,000
OEM fault code expansion	\$0	\$40,000	\$80,000
Support and maintenance	\$10,000	\$25,000	\$50,000
Total Costs	\$246,000	\$363,000	\$578,000

Profitability and Customer ROI

TRACE reaches profitability in Year 2. Net income: Year 1 (\$102K loss), Year 2 \$338K, Year 3 \$1.58M (73% gross margin). The high margin is driven by near-zero marginal cost per additional dealer (the LLM runs on the dealer's hardware, not TRACE servers).

For a dealer with 50 technicians deploying TRACE:

Metric	Value
Time saved per tech per day	1.4 hours
Hourly cost of technician	\$45/hour
Working days per year	250
Annual savings	\$787,500
TRACE annual cost (dealer license)	\$3,588
ROI	219x
Payback period	Under 2 days

The value proposition is extremely strong: TRACE costs less per year than a single day of technician idle time savings.
